MAJOR PROJECT PUBLIC NOTICE
APPLICATION DETERMINED
APA PROJECT No. 2010-104

Date: February 2, 2011

The purpose of this notice is to inform you that on **February 2, 2011**, the Agency conditionally approved the project and issued Permit **2011-104**.

The project is located in the Town of **Dresden, Washington County**, on or near **Deer Run Way**. The tax map number of the property site is Section **26** Block **4** Parcels **3.2 & 15**. The project involves a subdivision into sites including the lease of a 75 foot by 75 foot parcel for the construction of a new 90-foot-tall (above existing ground level - AGL) telecommunications tower within a 60 foot by 60 foot fenced-in equipment compound. The compound will be located 800± feet south of County Road 6. The tower will be painted a dark charcoal gray or black with a non-reflective flat or matte finish. A vegetative "no cutting" easement will protect trees in the vicinity of the proposed tower.

Within the fenced-in equipment compound, AT&T Mobility - Upstate NY is proposing to install 6 panel antennas on the tower (with future co-location of 3 additional panel antennas at the same height) and construct an 11.5-foot x 20-foot equipment shelter along with a backup generator. Access to the facility will be along an existing woods road which will be upgraded to accommodate construction and service vehicles. Underground utilities will be located along the edge of the access road. The proposed tower can potentially accommodate room for a second and third carrier within the compound and on the tower.

Please contact **Virginia Yamrick**, the assigned Environmental Program Specialist, if you should have any questions.
