This little girl has no County Beach in Washington County to go to next year - FIVE County Supervisors voted "NO" to the County Parks!

### The FIVE SUPERVISORS' lack of foresight includes the following facts:

- ⇒ Budget Burden on Sheriff's Department because of increased complaints about the public crossing private lands to get to the water.
- ⇒ Budget burden on Sheriff's Department in the future because the children who don't have positive things to do in the summer could be the unlawful of the future. Many of the less fortunate in Washington County do not have monies to take their children on summer day trips to costly parks.
- ⇒ Budget Burden on many entities including Washington County for changing brochures and websites within the County to show that Washington County no longer invites tourism.
- ⇒ GE Dredging Project in Fort Edward will restrict use of the Hudson River AND the Canal curtailing much needed sales tax dollars and recreation spots in the Whitehall and Washington County area.
- ⇒ Use of Warren County beaches by Washington County residents will increase Warren County sales tax revenue and loss to Fort Lauderdale and Huletts Landing surrounding businesses.
